

# Smart parcel stations for multi-party buildings.

**This is how the apartment building becomes a smart home!**

Parcel shipments increased by 20% in 2020, but what did not change were the delivery times of the much-awaited parcels. With Variocube lockers, you can say goodbye to pick-up bills. Increase the added value of your apartment building for owners and tenants by eliminating the need to pick up packages at impossible opening hours. A true premium experience.

A Variocube parcel station consists of multiple parcel lockers adapted to the number of residential units. Our systems can withstand even the harshest weather conditions, so it can be placed in a building or in the outdoor area of the apartment complex. Optionally, each party can also be integrated its own mail compartments with access flaps.

## Notification functions

Recipients are automatically notified about the inbox and can then pick it up 24/7.

## Easy maintenance & administration

Extensive admin tools allow you to quickly and easily troubleshoot. Registration and addition of family members to the account by the users themselves in the app.

## Ease of installation

For the installation of our lockers we only need a 230 V connection. The Internet connection is provided by an integrated mobile LTE module. This means that the installation takes place with little effort.
