

ServiceCube - lockers for service stations.

The solution for rental, service, tool distribution.

Use our ServiceCube software solution to hand over goods, equipment and tools or keep them in stock in a locker. Thanks to our comprehensive software, both inbound and outbound processes can be realized. This enables an exchange of goods with the customer in order to be able to receive defective devices or, if necessary, to exchange them immediately. Within the company, the handover of rental equipment can be arranged independently of time. The interfaces enable integration into existing processes and software solutions.

Advantages for your processes.

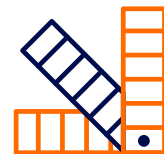

Integrated thanks to interfaces

Connection or integration with existing IT systems (warehouse database, rental and customer systems).

Intuitive backend

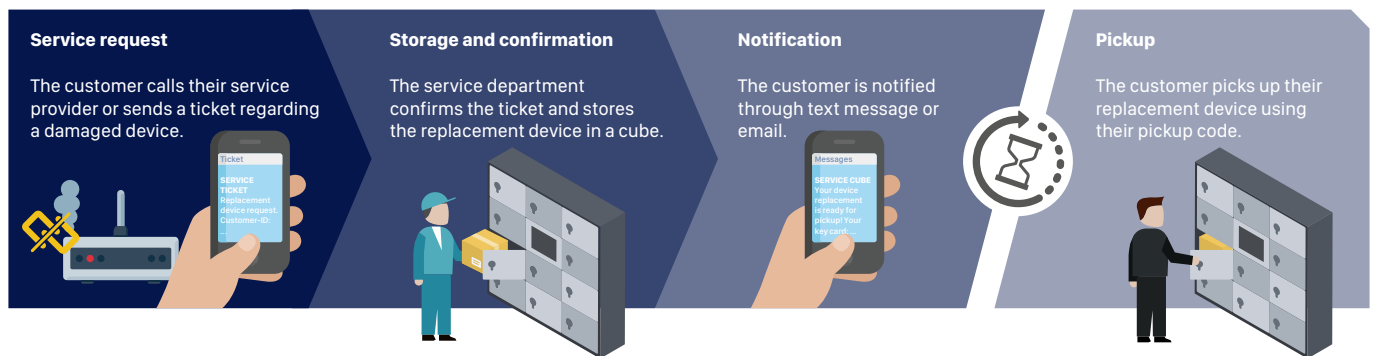

Backend for managing jobs, workload and access to maintenance functions.

Personalizable

The user interface can be customized to their desired design.

The process from acceptance to delivery.

How and where can ServiceCube be used?

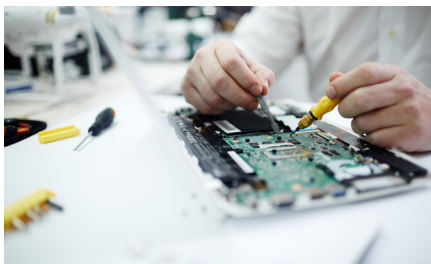

Versatility as a key factor.

Innovative approaches to solutions are a central part of progressive companies. ServiceCube enables modern exchange of goods and tools with lockers for service stations in your company. Make material, tool or other transfers more flexible and transparent. Especially for expensive special tools this pays off quickly. With just a few steps, you can obtain a rental history and know at any time what was taken out, when, by whom, or where which tool is currently located. With Variocube solutions, you can reduce costs, increase efficiency and improve personnel deployment.

Companies and office buildings..

Smart locker systems can perform numerous tasks in companies. As personal lockers for employees to pick up goods and equipment, as an internal mail station in the office building and much more. Due to the versatility of our hardware and software, there are (almost) no limits.

Drop-off/pick-up of defective equipment or rental.

Dropping off and picking up defective equipment or rental equipment is difficult for customers on a day-to-day basis; opening hours are often too short or distances too long. Simplify the handover with a smart pick-up station for equipment service and rental.

Locker systems for shopping malls.

The innovative Variocube smart locker system for shopping centers offers clear advantages for operators and visitors. Low maintenance costs and reduced personnel expenses are decisive for center operators.
