

Fresh menus 24/7 – The canteen for every size of business.

The SmartKitchen: Self-catering for your employees.

Catering for employees is an important issue for every employer and employee and can certainly influence the decision-making process of applicants. For companies, a company canteen is complex and cost-intensive, the requirements and demands vary greatly depending on the location of the company and the working time models, e.g. shift work. Especially for small and medium-sized companies, this challenge has hardly been mastered so far, although everyone knows how important the "physical well-being" of the employees is.

Hot food, light snacks, drinks and everything available 24/7.

Together with our cooperation partner Rieber GmbH & Co. KG and various caterers the solution: Variocube SmartKitchen. Smart and digital is revolutionising the world of company canteens! Our Variocube SmartKitchen is suitable for any size of company, requires no staff, is fresh, hot, cold, thirst-quenching, sustainable, available around the clock and can be operated intuitively in self-catering.

With the right offer for your employees, you will increase approval, gratitude and satisfaction. An employee benefit that makes you more attractive as an employer. We advise you to find the right size and solution for your company. There is the possibility of integrating sustainable reusable systems for the food packaging and from our network we can arrange a caterer/operator for you..

The advantages of a Variocube SmartKitchen Station.

Available 24/7

Your staff can order, reserve and collect food at any time.

Little effort for caterers

Store goods easily with just a few clicks or integrate them into existing shop systems.

Satisfied employees

Employee benefits increase satisfaction, which benefits your company.

Invest in the future and get more employee benefits.

Our Variocubes can do even more, as our software solutions are prepared for multiple use, applications such as parcel station, Click&Collect and many more can be activated at any time. For example: The online platform www.DigitalerMarktplatz.com can be used by regional traders who deliver the goods ordered by employees to the locker system at your company location. We will be happy to inform you about all the possibilities and benefits.

As a supplement to an existing canteen, the SmartKitchen can be used to expand the canteen offering, e.g. through additional sales of food that employees take home.

Software extensions for your Variocube for satisfied employees.

The smart thing about our locker stations is the software. With extensive standard functions, it offers numerous application options, such as parcel station, Click&Collect or mailroom service. Everything is already on board and can be activated as needed. An ideal employee benefit that also offers added value for your company.

PO.Box parcel station

Enables parcel delivery of private items directly to the locker at the workplace.

Click & Collect delivery

Do your employees like to shop locally? The Variocube becomes a drop-off point. Added value for your employees.

Intralogistics processes

Internal logistics can be handled via the Variocube. Securely transfer and distribute goods or documents.

The process from ordering food to eating it.
